

## Everline® Strongdor® FRP Series Fiberglass Reinforced Plastic Door

- Economical and easy to clean.
- Remarkably durable, they can withstand heavy traffic, abuse, or adverse environmental conditions.
- Look great for years, with only routine cleaning using mild soap and water.
- Manufactured with aluminum alloy stiles and rails, sized and configured for maximum strength without unnecessary bulk.

### FRP Series Pedestrian Door

The Everline® Strongdor® FRP Series Doors are the informed choice for the challenging environments such as schools, public buildings, water and wastewater treatment facilities, service entrances and other applications that quickly damage or even destroy lesser doors. It's incredibly scratch resistant, graffiti wipes right off with standard graffiti cleaners, and it will never need painting. With pebble grain finish and aluminum edges, these doors are able to withstand the harshest environments. These doors can improve energy efficiency while maintaining a clean environment.

## ► Standard Door Features

- ❶ Aluminum Perimeter – stiles and rails

Stiles and Rails	Configured for maximum strength
Urethane Core	Ensures impact resistance, flexural strength and thermal insulation
Thickness	1 <sup>3</sup> / <sub>4</sub> " (44.5 mm) thick
Colors	

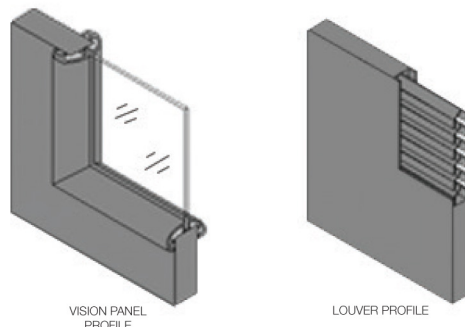

## Economic Strength

The Everline® Strongdor® FRP Series Doors are the best choice for sustainability. Our FRP doors will never corrode, rot or rust. This ability to outlast and outperform other doors makes the FRP Series the perfect choice for high-performance areas. It requires only routine cleaning with soap and water. The FRP Series also offers an economical and easy-to-clean alternative to stainless steel. Reduced weight makes our doors ADA-compliant as well as easier on hardware, framing and wall anchors, but less weight does not mean they're light duty doors.

## Customized Doors

The Everline® Strongdor® FRP Series Doors specialize in customizing to your specific needs. We take pride in creating your unique configurations such as arched doors and transoms, odd sizes, unequal pairs, monorail cutouts and dutch or bi-fold doors.

## ► Vision Panel & Louver Profiles

## Corrosive Resistant

Since fiberglass cannot corrode, rot, or rust, the FRP Series is perfect for areas that are prone to corrosive environments. The high quality of our doors and framing is the result of top of the line materials, individual craftsmanship, attention to detail, and a personal commitment to quality.
