

## Shieldok<sup>®</sup> Clima-T<sup>™</sup> Trailer Top Seal

- Provides a watertight seal to prevent moisture from affecting operations.
- This trailer top seal positions automatically.
- There is no manual activation required.
- Double layer of 40 oz. fabric, plus additional wear pleats in corners.
- Rugged galvanized steel mounting hardware eliminates corrosion.
- Ideal for decline approaches.

## Clima-T<sup>™</sup> Trailer Top Seal

The Shieldok<sup>®</sup> Clima-T<sup>™</sup> Trailer Top Seal can be installed on its own or retrofitted to an existing unit to keep rain water out of the traffic zone. This trailer top seal comes with easy installation above new or existing dock seals. The Shieldok<sup>®</sup> Clima-T<sup>™</sup> is a simple effective design with no required maintenance.

The Shieldok<sup>®</sup> Clima-T<sup>™</sup> combines weight with gravity, and provides a constant seal across the top of the trailer, creating a dam which forces the water to run off the sides. The dam creates a barrier against wind, insects, dust and light.

**FEATURES**

- ① Galvannized Trim Angle
- ② Galvannized Side Support Bracket
- ③ Galvannized Steel Frame
- ④ Galvannized Sheeting
- ⑤ Stays
- ⑥ 10" x 20" Wear Flaps/Pleats
- ⑦ Foam Filled Sweeper Pad
- ⑧ Storage Curtain
- ⑨ Double Layer of Fabric 40 oz.

For maximum value and performance, the Shieldok® Clima-T™ is constructed from our premium durability fabrics.

The Shieldok® Clima-T™ Trailer Top Seal creates a safer environment and protects property by diverting water away from the trailer opening. The Clima-T™ pushes down across the full width of the trailer top automatically and provides protection from water entering the dock area. They can easily be installed above most existing dock seals or shelters, and require no maintenance.

**► Technical Specifications**

- 24" (609.6 mm) projection
